

AEGIS-WM: Anticipatory Forensic Analysis Report

Generated on 2026-09-29 16:38:36 UTC | Analysis Identifier: **test_e2e_verification**

Source Telemetry	Friday-WorkingHours-Afternoon-DDos.pcap_ISCX.csv
File SHA-256 Hash	test_hash_123
Extraction Status	EXPLAINING
Extracted Flows	50000
Temporal Windows	3166
Alerts Triggered	0

Anticipatory Attack Forecast & Rollout Trajectory

Horizon	Timestamp	Infiltration Risk	95% CI	Predicted Stage	Risk Velocity
T + 1 (5s)	10:09:30	91.9%	[86% - 98%]	Impact	+0.92/s
T + 2 (10s)	10:09:35	99.5%	[99% - 100%]	Impact	+0.08/s
T + 3 (15s)	10:09:40	99.6%	[99% - 100%]	Impact	+0.00/s
T + 4 (20s)	10:09:45	99.6%	[99% - 100%]	Impact	-0.00/s
T + 5 (25s)	10:09:50	99.7%	[99% - 100%]	Impact	+0.00/s
T + 6 (30s)	10:09:55	99.7%	[99% - 100%]	Impact	-0.00/s

Evidence-Based Attribution & Driving Telemetry

Rank	Telemetry Feature	Attribution Weight	Direction
1	bwd_pkt_len_std	23.8% (+0.028)	increases_risk
2	bwd_pkt_len_mean	14.6% (+0.017)	increases_risk
3	syn_ack_ratio	8.1% (+0.010)	increases_risk
4	flow_iat_mean	6.2% (+0.007)	increases_risk
5	tcp_window_mean	4.9% (+0.006)	increases_risk

Authentic Supporting Telemetry Flows (Driving Window)

Source	Destination	Port	Proto	Packets	Bytes
host_55d18e0a79e8	host_2f0f6f4208bb	80	TCP	13	11657
host_c723cf73f454	host_2f0f6f4208bb	80	TCP	14	11663
host_4bcc1cbe6aa3	host_2f0f6f4208bb	80	TCP	14	11663
host_7147d0182562	host_2f0f6f4208bb	80	TCP	14	11663
host_d3e44aae49a0	host_2f0f6f4208bb	80	TCP	12	11663
host_8cac5568b568	host_2f0f6f4208bb	80	TCP	13	11663

Forensic Limitations & Methodological Safeguards

Scientific Methodology Notice: AEGIS-WM provides probabilistic anticipatory decision support derived from temporal state-transition modeling. Forecasts reflect behavioral consistency based on observed telemetry and do not constitute absolute guarantees of zero-day exploitation. Network operators must correlate these findings with endpoint host logs before executing defensive remediation.
