

AEGIS-WM: Anticipatory Forensic Analysis Report

Generated on 2026-09-29 16:11:03 UTC | Analysis Identifier: **test_job**

Source Telemetry	Friday-WorkingHours-Afternoon-DDos.pcap_ISCX.csv
File SHA-256 Hash	abc
Extraction Status	PENDING
Extracted Flows	0
Temporal Windows	0
Alerts Triggered	0

Anticipatory Attack Forecast & Rollout Trajectory

Horizon	Timestamp	Infiltration Risk	95% CI	Predicted Stage	Risk Velocity
T + 1 (5s)	08:36:10	0.0%	[0% - 0%]	Benign	+0.00/s
T + 2 (10s)	08:36:15	0.0%	[0% - 0%]	Benign	+0.00/s
T + 3 (15s)	08:36:20	0.0%	[0% - 0%]	Benign	+0.00/s
T + 4 (20s)	08:36:25	0.0%	[0% - 0%]	Benign	+0.00/s
T + 5 (25s)	08:36:30	0.0%	[0% - 0%]	Benign	+0.00/s
T + 6 (30s)	08:36:35	0.0%	[0% - 0%]	Benign	+0.00/s

Evidence-Based Attribution & Driving Telemetry

Rank	Telemetry Feature	Attribution Weight	Direction
1	active_flow_count	0.0% (+0.000)	increases_risk
2	new_connection_count	0.0% (+0.000)	increases_risk
3	unique_src_hosts	0.0% (+0.000)	increases_risk
4	unique_dst_hosts	0.0% (+0.000)	increases_risk
5	unique_dst_ports	0.0% (+0.000)	increases_risk

Authentic Supporting Telemetry Flows (Driving Window)

Source	Destination	Port	Proto	Packets	Bytes
host_d37deb62d292	host_61ff5b722c0a	443	TCP	36	6117
host_f3614ee2d0b0	host_61ff5b722c0a	443	TCP	41	9324
host_0e6e03d358f7	host_2f0f6f4208bb	80	TCP	38	5245
host_247f9c869bec	host_2f0f6f4208bb	80	TCP	36	4060
host_57d6eb029c34	host_2f0f6f4208bb	80	TCP	36	4060
host_205b54f4272b	host_2f0f6f4208bb	80	TCP	38	4643

Forensic Limitations & Methodological Safeguards

Scientific Methodology Notice: AEGIS-WM provides probabilistic anticipatory decision support derived from temporal state-transition modeling. Forecasts reflect behavioral consistency based on observed telemetry and do not constitute absolute guarantees of zero-day exploitation. Network operators must correlate these findings with endpoint host logs before executing defensive remediation.
